

Forklift Safety Week 2021

The Australian Forklift and Industrial Trucks Association has been presenting Forklift Safety Week since 2011. In light of the ongoing COVID-19 restrictions, we are again presenting this initiative as a series of online webinars.

Three seminars will be presented with the first webinar on 21 September 2021.

These seminars are aimed at safety managers, operations managers, team leaders and anyone responsible for the safe operation of forklift and industrial trucks in Australia.

The topics covered are essential knowledge for anyone involved in the use of forklift and industrial trucks.

The seminars will be presented using the Zoom conferencing platform. Each seminar will be approximately one hour in duration, consisting of 40-45 minutes of presentation and 15-20 minutes of questions.

To enable people to attend individual sessions, separate bookings need to be made using the TryBooking links below. Please note there is no charge to attend these sessions.
